Committed to the association ADIVBOIS

SUMMARY

The different ways of construction in France.

Cross laminated Timber

Timber support

Columns and Beams

Timber frame, externally and internally

The association ADIVBOIS « Living in Wood »

THE CLT WAY TO BUID IN FRANCE – the Offices / Commercial property

The prefabricated construction

The CLT : Rapid construction

THE SOCIAL HOUSING IN CLT AND STRAW INSULATION (RECYCLING)

STUDENT HOUSING IN CLT IN A VERY SMALL SITE IN PARIS (DESIGN)

« Maison de l'Inde », Paris - Architectes: Florence LIPSKY & Pascal ROLLET

A QUICK AND ECONOMICAL BUILT

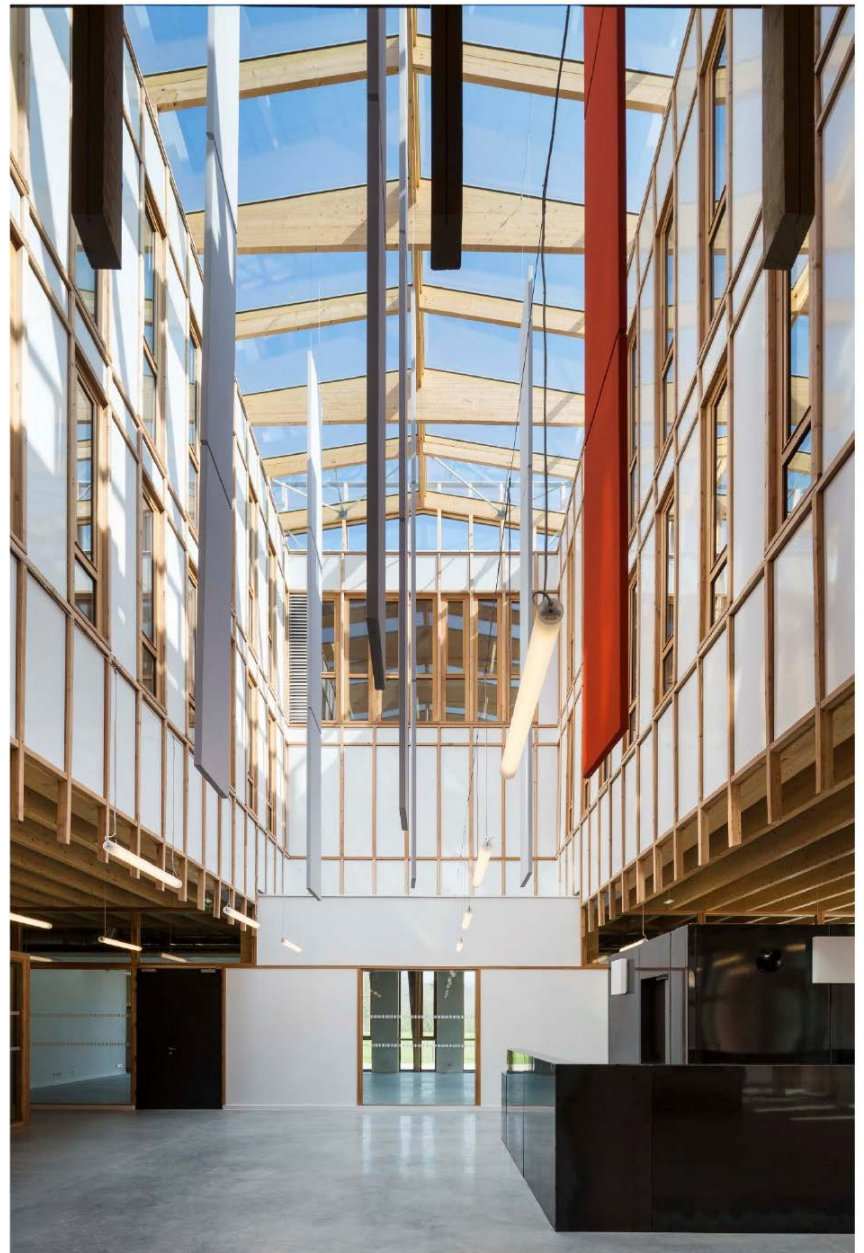

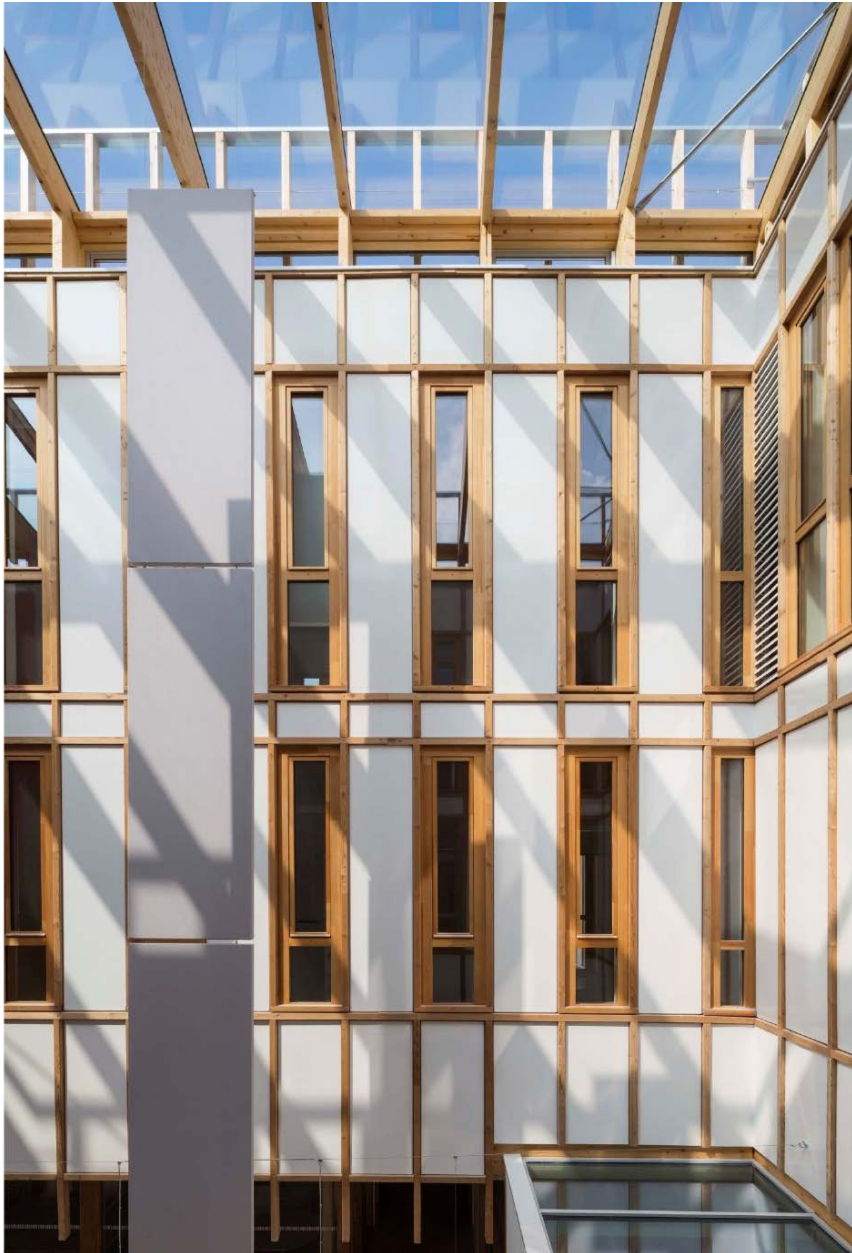

USING WOOD COLUMNS AND BEAMS ALSO AS A DESIGN FEATURE TO CREATE TRANQUIL OPEN SPACES

« Voyage Privé », Aix en Provence- Architectes: TANGRAM Architectes

HOW TO USE TRADITIONAL SYSTEMS IN MODERN BUILDS

In France our land and forests are rich in wood
How could we bring all the currents together ?

An Idea.....

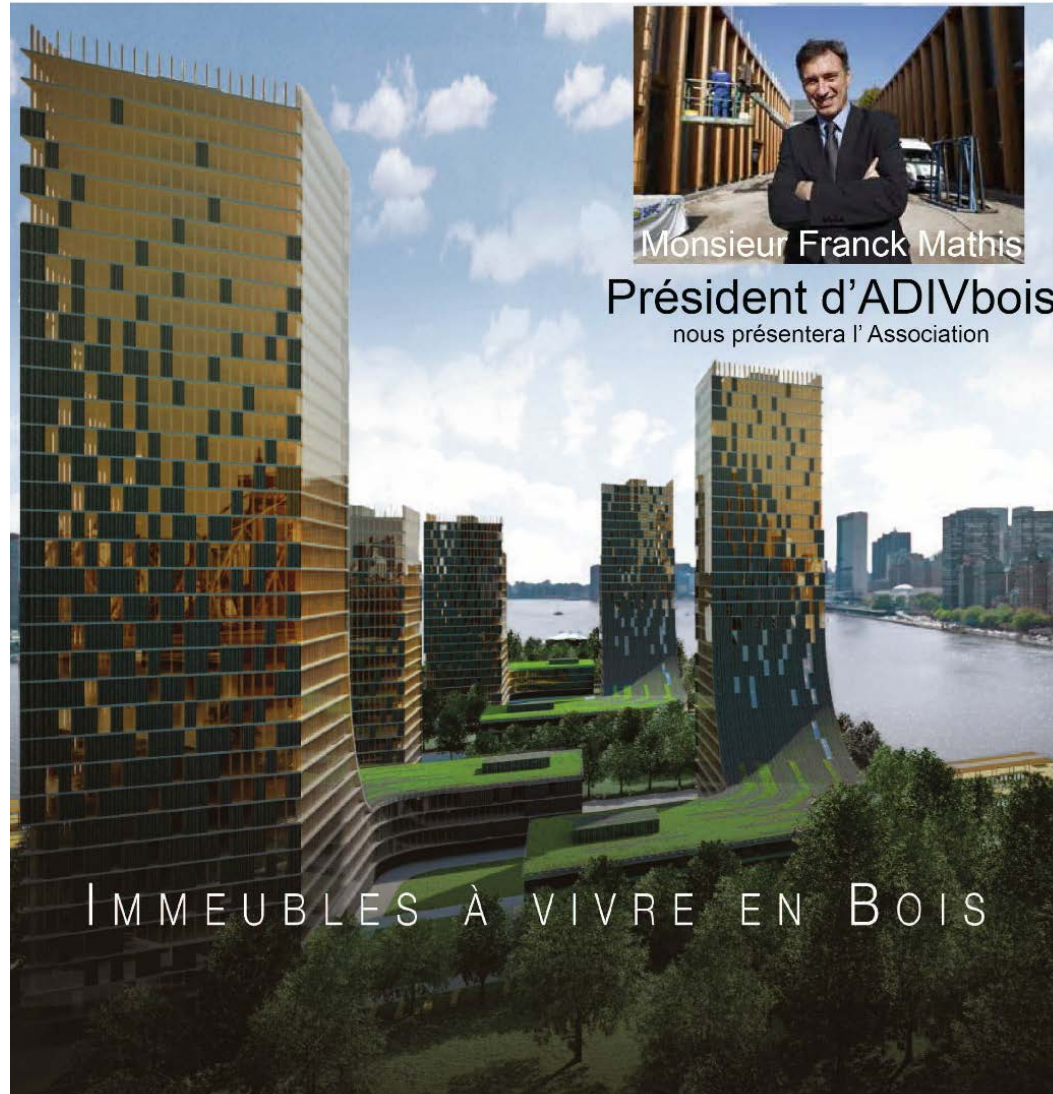

Building « **LIVING IN WOOD** » by

WHO IS ADIVBOIS

2 Developers (Building industry) and the state

The president Franck Mathis

IMMEUBLES À VIVRE EN BOIS

Living in wood Buildings

THE ARGUMENTS ?

The Urban argument

2050 : 2,5 MA new people in the city

The Economic argument

Stimulate the local Economy, the market and create jobs. It's a **WIN-WIN** !

The Eco-conservation argument

To play our part in limiting climate change, to be more ecoefficient

THE ANSWER !

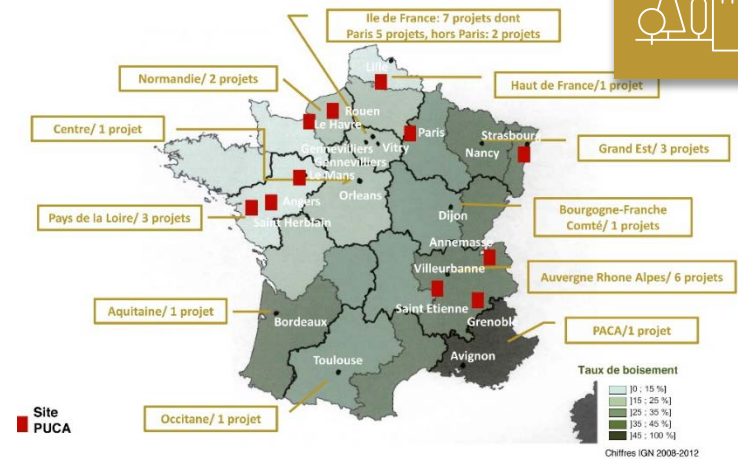

HIGH RISE TIMBER
CONSTRUCTION TROUGH
“LIVING WOOD”

THE PROJECT

High rise « **LIVING WOOD** »

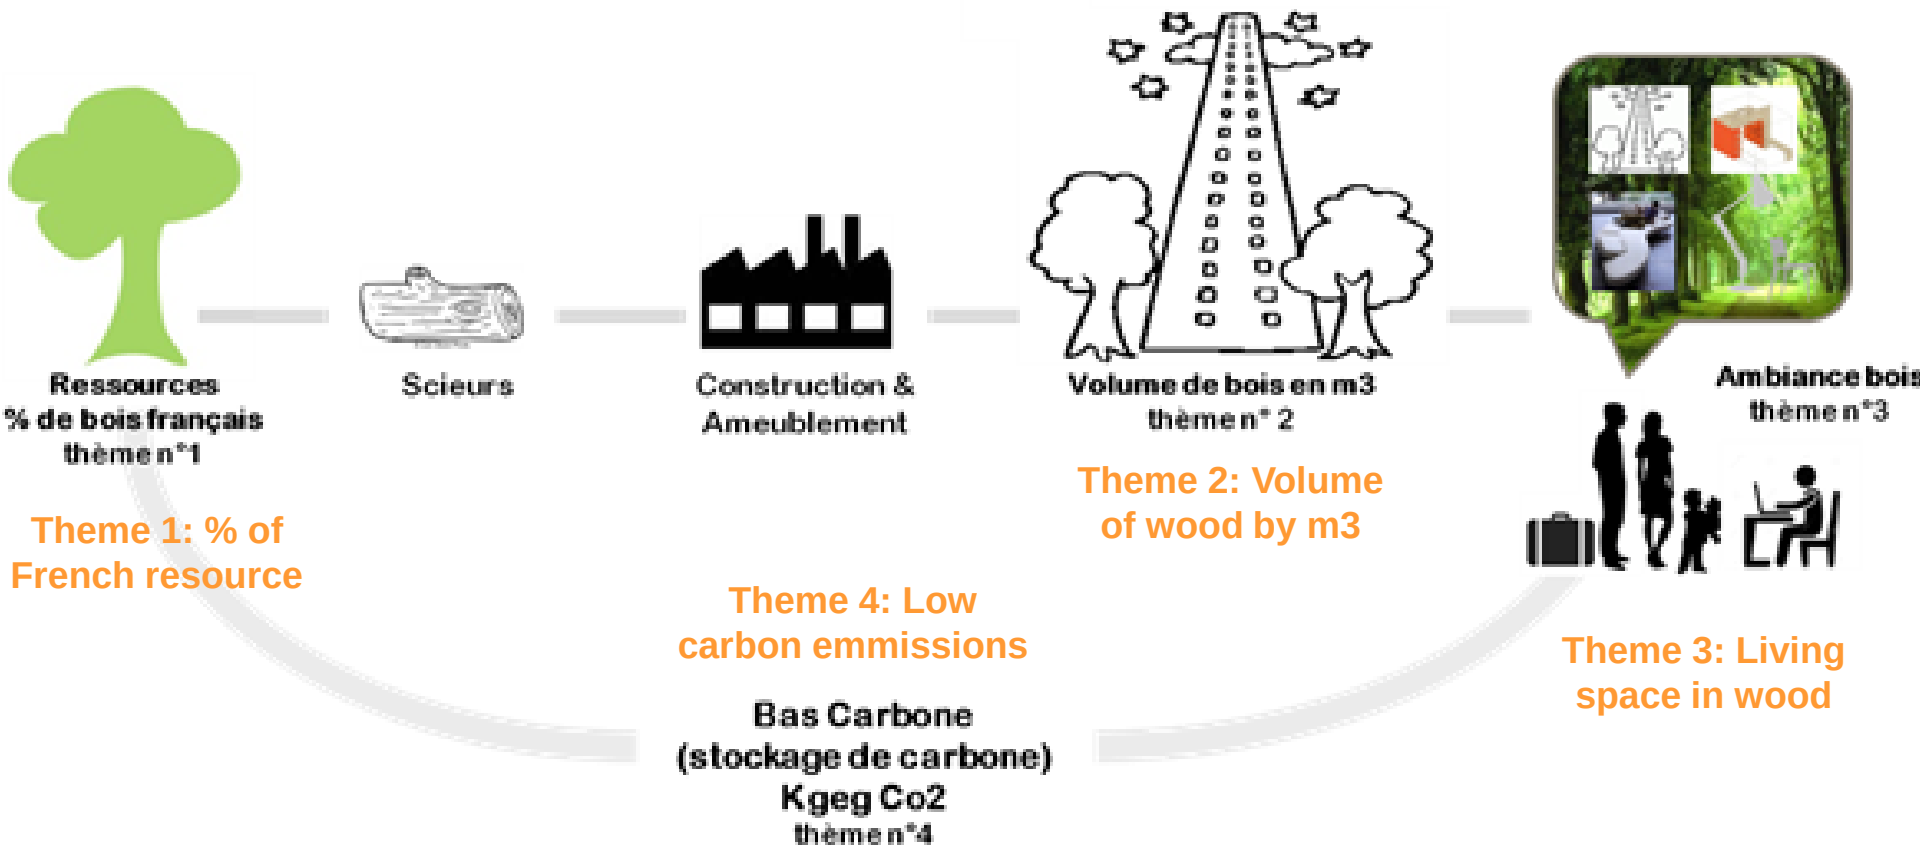

- 10 to 18 floors tomorrow
- 20 to 30 floors by 2030
- New Ways of working altogether : The property developer, the architect, the civil engineer, the designer and the State.
- Building in « **LIVING WOOD** »

*Tour Hyperion, Bordeaux,
Architecte : JP Viguier*

ADIVBOIS
